JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Author Index to Volume 53

Abt, Helmut A.
is the relationship between numbers of references and paper lengths the same for all sciences?, 1106–1112
Ackermann, Eric G.
[book review], 61–62, 969–970
Agosto, Denise E.
bounded rationality and satisficing in young people's Web-based decision making, 16–27
Alavi, Maryam
knowledge integration in virtual teams: the potential role of KMS, 1029–1037
Albano, Antonio
a typed text retrieval query language for XML documents, 467–488
Aljlayl, M.
on bidirectional English–Arabic search, 1139–1151
Allan, James
a survey in indexing and searching XML documents, 415–437
Allen, Bryce
cognitive and task influences on Web searching behavior, 109–119
Andersen, Jack
[book review], 690–691
Azagury, Alain
a novel navigation paradigm for XML repositories, 515–525
Baeza-Yates, Ricardo
preface: XML, 413–414
XQL and proximal nodes, 504–514
Bar-Ilan, Judit
methods for measuring search engine performance over time, 308–319
Barnett, George A.
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
Baruchson-Arbib, Shifra
a view to the future of the library and information science profession: a Delphi study, 397–408
Bazzell, Imani
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Beheshti, Jamsid
design criteria for children's Web portals: the users speak out, 79–94
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838
Benoit, G.
data discretization for novel relationship dis-covery in information retrieval, 736–746
Bilal, Dania
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
Billhardt, Holger
a context vector model for information retrieval, 236–249
Bishop, Ann Peterson
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Blair, David C.
knowledge management: hype, hope, or help?, 1019–1028
Borrajo, Daniel
a context vector model for information retrieval, 236–249
Boughanem, M.
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Boyack, Kevin W.
domain visualization using VxInsight® for science and technology management, 764–774
Boyce, Bert R.
in this issue, 1–2, 197, 255–256, 325–326, 529–530, 615–616, 693–694, 781, 877–878, 973, 1083–1084, 1191
Brajnik, Giorgio
strategic help in user interfaces for information retrieval, 343–358
Bronstein, Jenny
a view to the future of the library and information science profession: a Delphi study, 397–408
Brooks, Terrence A.
[book review], 967–968
Bruza, Peter
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Burke, Lauren
designing a new urban Internet, 863–865
Burkell, Jacquelyn
believe it or not: factors influencing credibility on the Web, 134–144
Burrell, Quentin L.
will this paper ever be cited?, 232–235
Burton, R.
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
Byström, Katriina
information and information sources in tasks of varying complexity, 581–591
Carmel, David
preface: XML, 413–414
Chan, Alvin T.S.
a survey in indexing and searching XML documents, 415–437
Chen, Chaomei
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Chen, Hui-Min
stochastic modeling of usage patterns in a Web-based information system, 536–548
Chen, Sherry Y.
cognitive styles and hypermedia navigation: development of a learning model, 3–15
Chinenyanga, Taurai Tapiwa
an expressive and efficient language for XML information retrieval, 438–453
Chrisment, C.
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Christensen, Frank Sejer
work tasks and socio-cognitive relevance: a specific example, 960–965
Chuang, Shui-Lung
subject categorization of query terms for exploring Web users' search interests, 617–630
Chung, Alan
a personal agent for Chinese financial news on the Web, 186–196
Cohen, Sara
EquiX—a search and query language for XML, 454–466
Colazzo, Dario
a typed text retrieval query language for XML documents, 467–488
Cole, Charles
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838
Cooper, Linda Z.
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922
methodology for a project examining cognitive categories for library information in young children, 1223–1231
Cooper, Michael D.
stochastic modeling of usage patterns in a Web-based information system, 536–548
Cothey, Vivian
a longitudinal study of World Wide Web users' information-searching behavior, 67–78
Cribbin, Timothy
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Croft, W. Bruce
a survey in indexing and searching XML documents, 415–437
Cronin, Blaise
banking (on) different forms of symbolic capital, 1267–1270

Cunliffe, Daniel
information architecture for bilingual Web sites, 866–873
Dai, Yubin
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
Davenport, Elisabeth
mundane knowledge management and micro-level organizational learning: an ethological approach, 1038–1046
Davidson, George S.
domain visualization using VxInsight® for science and technology management, 764–774
Day, Ronald E.
[book review], 60–61
introduction to the *JASIST* special section on knowledge management, 1008
social capital, value, and measure: Antonio Negri's challenge to capitalism, 1074–1082
Delcambre, Lois
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
D'Elia, George
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
Dennis, Simon
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Dianu, An-Chi Hoh
[book review], 320–321
Diaz, Irene
an algorithm for term conflation based on tree structures, 199–208
Dillon, Andrew
information architecture in *JASIST:* just where did we come from?, 821–823
Dillon, Tharam S.
a survey in indexing and searching XML documents, 415–437
Dragulanescu, Nicolae
emerging information society and history of information science in Romania, 41–46
Duff, Wendy
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
Durrance, Joan C.
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
Eastman, Caroline M.
30,000 hits may be better than 300: precision anomalies in Internet searches, 879–882
Egan, Kevin
information architecture for bilingual Web sites, 866–873
Egghe, Leo
[book review], 409–410
duality revisited: construction of fractional frequency distributions based on two dual Lotka laws, 789–801
sampling and concentration values of incom-plete bibliographies, 271–281
Ehikhamenor, Fabian A.
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611
Ellis, David
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703
information-seeking and mediated searching. part 2. uncertainty and its correlates, 704–715
information-seeking and mediated searching. part 3. successive searching, 716–727
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
Ennis, Lisa A.
[book review], 250–251, 612–613
Exner, Frank, Little Bear
[book review], 966
Factor, Michael E.
a novel navigation paradigm for XML repositories, 515–525
Faherty, Roisin
[book review], 1187–1188
Fan, Weiguo
getting answers to natural language questions on the Web, 359–364
Faulring, Andrew
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
Ford, Nigel
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703
information-seeking and mediated searching. part 2. uncertainty and its correlates, 704–715
information-seeking and mediated searching. part 3. successive searching, 716–727
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
Foster, Allen
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703
information-seeking and mediated searching. part 2. uncertainty and its correlates, 704–715
information-seeking and mediated searching. part 3. successive searching, 716–727
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
Fourie, Ina
[book review], 321–322
Frieder, O.
on bidirectional English–Arabic search, 1139–1151
Furner, Jonathan
on recommending [by document retrieval system], 747–763
Garfield, Eugene
algorithmic procedure for finding semantically related journals, 1113–1119
is the relationship between numbers of references and paper lengths the same for all sciences?, 1106–1112
Ghelli, Giorgio
a typed text retrieval query language for XML documents, 467–488
Gorbunov, Andrey L.
relevance of Web documents: Ghosts Consensus Method, 783–788
Gorman, Paul
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
Grossman, D.
on bidirectional English–Arabic search, 1139–1151
Gu, Yinian
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
Hargittai, Eszter
beyond logs and surveys: in-depth measures of people's Web use skills, 1239–1244
Hauck, Roslin V.
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Haverty, Marsha
information architecture without internal theory: an inductive design process, 839–845
He, Shaoyi
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation,* 953–959
Heidorn, P. Bryan
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258
Hjørland, Birger
[book review], 57
epistemology and socio-cognitive perspective in information science, 257–270
meta-analysis should also be visible inside information science [letter to the editor], 324
the special competency of information specialists [letter to the editor], 1275–1276
work tasks and socio-cognitive relevance: a specific example, 960–965
Huber, John C.
a new model that generates Lotka's law, 209–219
Huws, Rhian
information architecture for bilingual Web sites, 866–873
Janes, Joseph
digital reference: reference librarians' experiences and attitudes, 549–566

Järvelin, Kalervo
using graded relevance assessments in IR evaluation, 1120–1129
Jarvis, Melanie
information architecture for bilingual Web sites, 866–873
Jones, Helen
information architecture for bilingual Web sites, 866–873
Jones, Matt
[book review], 1184
Jones, Steve
automatic extraction of document keyphrases for use in digital libraries: evaluation and applications, 653–677
Jörgensen, Corinne
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
Kanza, Yaron
EquiX—a search and query language for XML, 454–466
Kekäläinin, Jaana
using graded relevance assessments in IR evaluation, 1120–1129
Khoo, Christopher S. G.
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
Kim, Kyung-Sun
cognitive and task influences on Web searching behavior, 109–119
Koehler, Wallace
Web page change and persistence—a four-year longitudinal study, 162–171
Kogan, Yakov
EquiX—a search and query language for XML, 454–466
Kracker, Jacqueline
research anxiety and students' perceptions of research: an experiment. part I. effect of teaching Kuhlthau's ISP model, 282–294
research anxiety and students' perceptions of research: an experiment. part II. content analysis of their writings on two exper-iences, 295–307
Kraft, Donald H.
what's new in *JASIST*, 614
Kushmerick, Nicholas
an expressive and efficient language for XML information retrieval, 438–453
Lalmas, Mounia
combining and selecting characteristics of information use, 378–396
Lam, H.M.
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
Large, Andrew
design criteria for children's Web portals: the users speak out, 79–94
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838
Latham, Don
information architecture: notes toward a new curriculum, 824–830
Lavelle, Mary
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
Law, Derek G.
[book review], 1271–1272
Lehr, Jennifer K.
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
Leong, H.V.
a survey in indexing and searching XML documents, 415–437
Lewis, Michael
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
Leydesdorff, Loet
dynamic and evolutionary updates of classificatory schemes in scientific journal structures, 987–994
Libner, Kelsey
getting answers to natural language questions on the Web, 359–364
Lincicum, Shirley J.
[book review], 410–411
Lini, Luca
a typed text retrieval query language for XML documents, 467–488
Lloréns, Juan
an algorithm for term conflation based on tree structures, 199–208
Loh, Teck Ee
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
Lokhaiser, Mary F.
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258
Lucas, Wendy
form and function: the impact of query term and operator usage on Web search results, 95–108
Luk, Robert W.P.
a survey in indexing and searching XML documents, 415–437
Ma, Wei
a database selection expert system based on reference librarian's database selection strategy: a usability and empirical evaluation, 567–580
Ma, Yan
a design analysis model for developing World Wide Web sites, 531–535
Maarek, Yoelle S.
a novel navigation paradigm for XML repositories, 515–525
preface: XML, 413–414
Macredie, Robert D.
cognitive styles and hypermedia navigation: development of a learning model, 3–15
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Maglaughlin, Kelly L.
user perspectives on relevance criteria: a comparison among relevant, partially relevant, and not-relevant judgments, 327–342
Maier, David
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
Mandler, Benny
a novel navigation paradigm for XML repositories, 515–525
Manghi, Paolo
a typed text retrieval query language for XML documents, 467–488
Maojo, Victor
a context vector model for information retrieval, 236–249
Marchionini, Gary
co-evolution of user and organizational interfaces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
McArthur, Robert
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
McInerney, Claire
introduction to the *JASIST* special section on knowledge management, 1008
knowledge management and the dynamic nature of knowledge, 1009–1018
Mehra, Bharat
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Meuss, Holger
querying and ranking XML documents, 489–503
Mizzaro, Stefano
strategic help in user interfaces for information retrieval, 343–358
Morar, Sonali
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Morato, Jorge
an algorithm for term conflation based on tree structures, 199–208
Morrison, Julie B.
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
Morse, Emile
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
Munro, Siân
information architecture for bilingual Web sites, 866–873
Nam, In-Yong
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
Navarro, Gonzalo
XQL and proximal nodes, 504–514
Nutt, Werner
EquiX—a search and query language for XML, 454–466

Olsen, Kai A.
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
Ozmutlu, H. Cenk
multitasking information seeking and search-ing processes, 639–652
Ozmutlu, Seda
multitasking information seeking and search-ing processes, 639–652
Paoli, Michele
a typed text retrieval query language for XML documents, 467–488
Park, Han Woo
hyperlink-affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
Paynter, Gordon W.
automatic extraction of document keyphrases for use in digital libraries: evaluation and applications, 653–677
Petrou, Anastasis (Tassos) D.
[book review], 58–60
Pettigrew, Karen E.
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
Pirolli, Peter
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
Pu, Hsiao-Tieh
subject categorization of query terms for exploring Web users' search interests, 617–630
Pudovkin, Alexander I.
algorithmic procedure for finding semantically related journals, 1113–1119
Radev, Dragomir R.
getting answers to natural language questions on the Web, 359–364
Rahman, Tarjin
design criteria for children's Web portals: the users speak out, 79–94
Rao, I.K. Ravichandra
duality revisited: construction of fractional frequency distributions based on two dual Lotka laws, 789–801
Rice, Ronald E.
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
Rieh, Soo Young
judgment of information quality and cognitive authority in the Web, 145–161
Riggs, Ken Roger
XML and free text, 526–528
Rodger, Eleanor Jo
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
Roh, Seak-Zoon
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
Rosenfeld, Louis
information architecture: looking ahead, 874–876
Rosenholtz, Ruth
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
Ruthven, Ian
combining and selecting characteristics of information use, 378–396
Sagiv, Yehoshua
EquiX—a search and query language for XML, 454–466
Sandusky, Robert J.
[book review], 1185–1187
Sartiani, Carlo
a typed text retrieval query language for XML documents, 467–488
Schlieder, Torsten
querying and ranking XML documents, 489–503
Schroeder, Alan T., Jr.
[book review], 251–253
Seneque, Megan
knowledge management in three organizations: an exploratory study, 1047–1059
Serebrenik, Alexander
EquiX—a search and query language for XML, 454–466
Shaw, Debora
banking (on) different forms of symbolic capital, 1267–1270
Slone, Debra J.
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
Smith, Cynthia
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Soffer, Aya
preface: XML, 413–414
Sonnenwald, Diane H.
user perspectives on relevance criteria: a comparison among relevant, partially relevant, and not-relevant judgments, 327–342
Southon, F.C. Gray
knowledge management in three organizations: an exploratory study, 1047–1059
Spink, Amanda
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation*, 953–959
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703
information-seeking and mediated searching. part 2. uncertainty and its correlates, 704–715
information-seeking and mediated searching. part 3. successive searching, 716–727
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
introduction to the special issue on Web research, 65–66
multitasking information seeking and search-ing processes, 639–652
Sreenivasulu, V.
engineering a search engine (WebLib) and browser (Knowledge Navigator) for digital libraries: global knowledge discovery tools exclusively for librarians and libraries on the Web [letter to the editor], 1273–1275
Stirling, Dale A.
[book review], 968–969
Száva-Kováts, Endre
indirect-collective referencing (ICR) in the elite journal literature of physics. II. a literature science study on the level of communications, 47–56
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
Tamine, L.
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Tasso, Carlo
strategic help in user interfaces for information retrieval, 343–358
Thelwall, Mike
conceptualizing document on the Web: an evaluation of different heuristic-based models for counting links between university Web sites, 995–1005
Tiwana, Amrit
knowledge integration in virtual teams: the potential role of KMS, 1029–1037
Todd, Ross J.
knowledge management in three organizations: an exploratory study, 1047–1059
Toms, Elaine G.
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
information architecture: providing a framework for information architecture, 855–862
Topi, Heikki
form and function: the impact of query term and operator usage on Web search results, 95–108
Tseng, Yuen-Hsien
automatic thesaurus generation for Chinese documents, 1130–1138
Unruh, Kenton T.
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
van Rijsbergen, Keith
combining and selecting characteristics of information use, 378–396
Venuti, Fabio
strategic help in user interfaces for information retrieval, 343–358
Wallace, Raven
[book review], 775–777
Wang, Peiling
research anxiety and students' perceptions of research: an experiment. part II. content analysis of their writings on two exper-iences, 295–307
Warner, Julian
[book review], 775

Wathen, C. Nadine
believe it or not: factors influencing credibility on the Web, 134–144
Weisband, Suzanne
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
White, Howard D.
library and information science (LIS) in aid of meta-analysis [letter to the editor], 323
Whitley, Katherine M.
analysis of SciFinder Scholar and Web of Science citation searches, 1210–1215
Whitmire, Ethelene
[book review], 966–967
disciplinary differences and undergraduates' information-seeking behavior, 631–638
Wildemuth, Barbara M.
introduction and overview: effective methods for studying information seeking and use, 1218–1222
Wilson, T.D.
information-seeking and mediated searching, part 1. theoretical framework and re-search design, 695–703
information-seeking and mediated searching, part 2. uncertainty and its correlates, 704–715
information-seeking and mediated searching, part 3. successive searching, 716–727
information-seeking and mediated searching, part 4. cognitive styles in information-seeking, 728–735
information-seeking and mediated searching, part 5. user–intermediary interaction, 883–893
Windsor, Donald A.
integer partitions result in skewed rank-frequency distributions [letter to the editor], 1276
Woelfel, Joseph
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
Wolfram, Dietmar
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
state digital library usability: contributing organizational factors, 1085–1097
Woodruff, Allison
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
Wylie, Brian N.
domain visualization using VxInsight® for science and technology management, 764–774
Xie, Hong (Iris)
state digital library usability: contributing organizational factors, 1085–1097
Yang, Christopher C.
a personal agent for Chinese financial news on the Web, 186–196
Yang, Chyan
subject categorization of query terms for exploring Web users' search interests, 617–630
Yu, Byeong-Min
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
Zhang, Jin
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
Zhang, Xiangmin
collaborative relevance judgment: a group consensus method for evaluating user search performance, 220–231

JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Subject Index to Volume 53

Academic Libraries. ***See*** **Libraries and Librarians**

Adolescents. ***See also*** **Children**
bounded rationality and satisficing in young people's Web-based decision making, 16–27

Africa
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611

African Americans
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266

Algorithms
algorithmic procedure for finding semantically related journals, 1113–1119
an algorithm for term conflation based on tree structures, 199–208
automatic extraction of document keyphrases for use in digital libraries: evaluation and applications, 653–677
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942

Anxiety
research anxiety and students' perceptions of research: an experiment. part I. effect of teaching Kuhlthau's ISP model, 282–294
research anxiety and students' perceptions of research: an experiment. part II. content analysis of their writings on two exper-iences, 295–307

Arabic
on bidirectional English–Arabic search, 1139–1151

Archives
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238

Ask Jeeves for Kids
design criteria for children's Web portals: the users speak out, 79–94

Authors and Authorship
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
banking (on) different forms of symbolic capital, 1267–1270
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation*, 953–959
duality revisited: construction of fractional frequency distributions based on two dual Lotka laws, 789–801
indirect-collective referencing (ICR) in the elite journal literature of physics. II. a literature science study on the level of communications, 47–56

Authors and Authorship (*Continued*)
a new model that generates Lotka's law, 209–219
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
will this paper ever be cited?, 232–235

Automatic Classification
subject categorization of query terms for exploring Web users' search interests, 617–630

Automatic Indexing
automatic extraction of document keyphrases for use in digital libraries: evaluation and applications, 653–677
a survey in indexing and searching XML documents, 415–437

Automatic Thesaurus Construction
automatic thesaurus generation for Chinese documents, 1130–1138

BadgerLink
state digital library usability: contributing organizational factors, 1085–1097

Basic Stepwise (BASSTEP) Testing Method
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40

Bibliographies
sampling and concentration values of incom-plete bibliographies, 271–281

Bibliometrics
algorithmic procedure for finding semantically related journals, 1113–1119
dynamic and evolutionary updates of classificatory schemes in scientific journal structures, 987–994
indirect-collective referencing (ICR) in the elite journal literature of physics. II. a literature science study on the level of communications, 47–56
is the relationship between numbers of references and paper lengths the same for all sciences?, 1106–1112
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105

Biglan Model of Disciplinary Differences
disciplinary differences and undergraduates' information-seeking behavior, 631–638

Bilingual Web Sites
information architecture for bilingual Web sites, 866–873

Biological Information Browsing Environment (BIBE)
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258

Biomedical Literature
algorithmic procedure for finding semantically related journals, 1113–1119
is the relationship between numbers of references and paper lengths the same for all sciences?, 1106–1112

Book Reviews
Accessing and Browsing Information and Communication (Ronald E. Rice, Maureen McCreadie, and Shan-Ju L. Chang), 1185–1187
Automatic Summarization (Inderjeet Mani), 410–411
Cyber-Marx: Cycles and Circuits of Struggle in High-Technology Capitalism (Nick Dyer-Witheford), 60–61
Data Privacy in the Information Age (Jacqueline Klosek), 251–253
Designing with JavaScript: Creating Dynamic Web Pages (Nick Heinle and Bill Peña), 967–968
The Digital Divide: Facing a Crisis or Creating a Myth? (ed. Benjamin M. Compaine), 612–613
Digital Preservation and Metadata: History, Theory, Practice (Susan S. Lazinger), 1271–1272
The Future of Classification (Rita Marcella and Arthur Maltby), 57
Identifying and Analyzing User Needs: A Complete Handbook and Ready-to-Use Assessment Workbook with Disk (Lynn Westbrook), 966–967
Information Knowledge, Text (Julian Warner), 690–691
Intelligent Technologies in Library and Information Service Applications (F. W. Lancaster and Amy Warner), 321–322
The Laws of the Web: Patterns in the Ecology of Information (Bernardo A. Huberman), 969–970
The Map Library in the New Millennium (R. B. Parry and C. R. Perkins), 250–251
Mathematical Foundations of Information Retrieval (Sandor Dominich), 409–410
The Modern Invention of Information: Discourse, History, and Power (Ronald E. Day), 966
A Nation Transformed by Information: How Information Has Shaped the United States from Colonial Times to the Present (Alfred D. Chandler, Jr. and James W. Cortada), 775
Principles of Web Design (David K. Farkas and Jean B. Farkas), 968–969
Saving the Time of the Library User Through Subject Access Innovation: Papers in Honor of Pauline Atherton Cochrane (William J. Wheeler), 58–60
The Social Life of Information (John Seely Brown and Paul Duguid), 320–321

Book Reviews (*Continued*)
A Sociological Theory of Communication: The Self-Organization of the Knowledge-Based Society (Loet Lydesdorff), 61–62
Strategies for Electronic Commerce and the Internet (Henry C. Lucas, Jr.), 1187–1188
Usability for the Web: Designing Web Sites that Work (Tom Brinck, Darren Gergle, and Scott D. Wood), 775–777
Usability Testing for Library Web Sites: A Hands-On Guide (Elaina Norlin and C.M. Winters), 1184
Books
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922
Bounded Rationality
bounded rationality and satisficing in young people's Web-based decision making, 16–27
work tasks and socio-cognitive relevance: a specific example, 960–965
Browsers
children's use of the Yahooligans! Web search engine. III. cognitive and physical behav-iors on fully self-generated search tasks, 1170–1183
engineering a search engine (WebLib) and browser (Knowledge Navigator) for digital libraries: global knowledge discovery tools exclusively for librarians and libraries on the Web [letter to the editor], 1273–1275
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
Browsing
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
a longitudinal study of World Wide Web users' information-searching behavior, 67–78
Bureau of Labor Statistics
co-evolution of user and organizational inter-faces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
Burton, R.E.
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
Capitalism
social capital, value, and measure: Antonio Negri's challenge to capitalism, 1074–1082
Categorization. ***See*** **Classification**
CD-ROM Publications
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922
Chemical Abstracts
analysis of SciFinder Scholar and Web of Science citation searches, 1210–1215
Children. ***See also*** **Students**
bounded rationality and satisficing in young people's Web-based decision making, 16–27
Children (*Continued*)
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
design criteria for children's Web portals: the users speak out, 79–94
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838
methodology for a project examining cognitive categories for library information in young children, 1223–1231
Chinese
automatic thesaurus generation for Chinese documents, 1130–1138
a personal agent for Chinese financial news on the Web, 186–196
subject categorization of query terms for exploring Web users' search interests, 617–630
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
Citation Analysis
domain visualization using VxInsight® for science and technology management, 764–774
dynamic and evolutionary updates of classificatory schemes in scientific journal structures, 987–994
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Citation Indexes
analysis of SciFinder Scholar and Web of Science citation searches, 1210–1215
Citations
algorithmic procedure for finding semantically related journals, 1113–1119
banking (on) different forms of symbolic capital, 1267–1270
indirect-collective referencing (ICR) in the elite journal literature of physics. II. a literature science study on the level of communications, 47–56
is the relationship between numbers of references and paper lengths the same for all sciences?, 1106–1112
will this paper ever be cited?, 232–235
Classification
algorithmic procedure for finding semantically related journals, 1113–1119
dynamic and evolutionary updates of classificatory schemes in scientific journal structures, 987–994
methodology for a project examining cognitive categories for library information in young children, 1223–1231
subject categorization of query terms for exploring Web users' search interests, 617–630
Web page change and persistence—a four-year longitudinal study, 162–171
Clinical Information. ***See*** **Medical Informatics**
Co-Citation Analysis. ***See*** **Citation Analysis**
Co-Occurrence of Terms. ***See*** **Term Co-Occurrence**
Cognitive Authority
judgment of information quality and cognitive authority in the Web, 145–161
Cognitive Load
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Cognitive Processes
bounded rationality and satisficing in young people's Web-based decision making, 16–27
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
cognitive and task influences on Web searching behavior, 109–119
Cognitive Science
epistemology and socio-cognitive perspective in information science, 257–270
Cognitive Styles
cognitive styles and hypermedia navigation: development of a learning model, 3–15
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
Collaboration. ***See also*** **Group Processes**
collaborative relevance judgment: a group consensus method for evaluating user search performance, 220–231
Collaborative Filtering
on recommending [by document retrieval system], 747–763
Communication
indirect-collective referencing (ICR) in the elite journal literature of physics. II. a literature science study on the level of communications, 47–56
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611
Community Network Systems
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
Computer Science
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
Concentration Measures
sampling and concentration values of incom-plete bibliographies, 271–281
Conference Proceedings
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
Constancy
Web page change and persistence—a four-year longitudinal study, 162–171

Constructive Induction
information architecture without internal theory: an inductive design process, 839–845
Content Analysis
research anxiety and students' perceptions of research: an experiment. part II. content analysis of their writings on two exper-iences, 295–307
Content–Collaboration–Context (CCC) Model
on recommending [by document retrieval system], 747–763
Context Vector Model
a context vector model for information retrieval, 236–249
Contextual Information Formula
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
CopNet (Database)
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Credibility of Information
believe it or not: factors influencing credibility on the Web, 134–144
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
judgment of information quality and cognitive authority in the Web, 145–161
Creutzfeldt-Jacob Disease, Variant
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Critical Theory
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
Cross-Language Information Retrieval (CLIR)
on bidirectional English–Arabic search, 1139–1151
Cumulative Advantage
a new model that generates Lotka's law, 209–219
Curriculum
information architecture: notes toward a new curriculum, 824–830
DARE (Distance Angle Retrieval Environment)
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
Data Collection
beyond logs and surveys: in-depth measures of people's Web use skills, 1239–1244
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
methodology for a project examining cognitive categories for library information in young children, 1223–1231
Data Discretization Model
data discretization for novel relationship dis-covery in information retrieval, 736–746
Data Management
knowledge management: hype, hope, or help?, 1019–1028
Database Selection
a database selection expert system based on reference librarian's database selection strategy: a usability and empirical evaluation, 567–580
Databases
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Decision Making
bounded rationality and satisficing in young people's Web-based decision making, 16–27
information and information sources in tasks of varying complexity, 581–591
Design. *See also* Information Architecture
co-evolution of user and organizational interfaces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
a design analysis model for developing World Wide Web sites, 531–535
design criteria for children's Web portals: the users speak out, 79–94
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838
information architecture without internal theory: an inductive design process, 839–845
state digital library usability: contributing organizational factors, 1085–1097
Developing Nations
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611
Dialog Information Service
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
Diaries
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
Digital Democracy Systems
relevance of Web documents: Ghosts Consensus Method, 783–788
Digital Divide. *See* Information Access
Digital Libraries. *See also* Libraries and Librarians
automatic extraction of document keyphrases for use in digital libraries: evaluation and applications, 653–677
digital reference: reference librarians' exper-iences and attitudes, 549–566
engineering a search engine (WebLib) and browser (Knowledge Navigator) for digital libraries: global knowledge discovery tools exclusively for librarians and libraries on the Web [letter to the editor], 1273–1275
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
state digital library usability: contributing organizational factors, 1085–1097
a view to the future of the library and information science profession: a Delphi study, 397–408
Directory-Based Web Searching
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Disciplines
disciplinary differences and undergraduates' information-seeking behavior, 631–638
Document Space
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
Document Type Definition. *See* DTD (Document Type Definition)
Document Weighting
combining and selecting characteristics of information use, 378–396
Documents
conceptualizing documentation on the Web: an evaluation of different heuristic-based models for counting links between university Web sites, 995–1005
querying and ranking XML documents, 489–503
a survey in indexing and searching XML documents, 415–437
Domain Analysis
domain visualization using VxInsight® for science and technology management, 764–774
epistemology and socio-cognitive perspective in information science, 257–270
the special competency of information specialists [letter to the editor], 1275–1276
DTD (Document Type Definition)
EquiX—a search and query language for XML, 454–466
XML and free text, 526–528
Dual Task Methodology
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
E-Commerce
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
E-Mail
co-evolution of user and organizational interfaces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
Economics
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611
Electronic Networks. *See* Internet
Electronic Publications
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922

ELIXIR
an expressive and efficient language for XML information retrieval, 438–453
English
on bidirectional English–Arabic search, 1139–1151
Epistemology
epistemology and socio-cognitive perspective in information science, 257–270
EquiX
EquiX—a search and query language for XML, 454–466
ERIn (Evaluation–Recommendation–Information) Model
on recommending [by document retrieval system], 747–763
Excite (Search Engine)
multitasking information seeking and search-ing processes, 639–652
Expert Systems
a database selection expert system based on reference librarian's database selection strategy: a usability and empirical evaluation, 567–580
Experts
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
knowledge management: hype, hope, or help?, 1019–1028
Extended Vector Space Model
a survey in indexing and searching XML documents, 415–437
eXtensible Markup Language (XML). *See* XML (eXtensible Markup Language)
Feedback. *See also* Relevance Feedback
on recommending [by document retrieval system], 747–763
Field Dependence
cognitive styles and hypermedia navigation: development of a learning model, 3–15
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
File System for XML
a novel navigation paradigm for XML repositories, 515–525
Filtering Systems
on recommending [by document retrieval system], 747–763
Financial Information
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
a personal agent for Chinese financial news on the Web, 186–196
FIRE Knowledge Base System
user perspectives on relevance criteria: a comparison among relevant, partially relevant, and not-relevant judgments, 343–358
FlashSite 1.01
Web page change and persistence—a four-year longitudinal study, 162–171
Fractional Frequency Distributions
duality revisited: construction of fractional frequency distributions based on two dual Lotka laws, 789–801
Free Text
XML and free text, 526–528
Frequency Distributions
duality revisited: construction of fractional frequency distributions based on two dual Lotka laws, 789–801
integer partitions result in skewed rank-frequency distributions [letter to the editor], 1276
Full-Text Search
a survey in indexing and searching XML documents, 415–437
Galter Health Sciences Library
a design analysis model for developing World Wide Web sites, 531–535
Genetic Algorithms
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Genetics Literature
algorithmic procedure for finding semantically related journals, 1113–1119
Geographic Distribution of Authors
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation*, 953–959
Ghosts Consensus Method
relevance of Web documents: Ghosts Consensus Method, 783–788
Google
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Gosnell, C.F.
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
Government Agencies. *See* Public Agencies
Graduate Students
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
Graphical Representation
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
domain visualization using VxInsight® for science and technology management, 764–774
Graphical User Interfaces
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Group Processes
collaborative relevance judgment: a group consensus method for evaluating user search performance, 220–231
knowledge integration in virtual teams: the potential role of KMS, 1029–1037
Group Processes (*Continued*)
methodology for a project examining cognitive categories for library information in young children, 1223–1231
mundane knowledge management and micro-level organizational learning: an ethological approach, 1038–1046
"Half-Life" of Literature
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
Health Information
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Help Systems
user perspectives on relevance criteria: a comparison among relevant, partially relevant, and not-relevant judgments, 343–358
Heuristic-Based Models
conceptualizing documentation on the Web: an evaluation of different heuristic-based models for counting links between university Web sites, 995–1005
Historians
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
History of Information Science
emerging information society and history of information science in Romania, 41–46
Human Resources
knowledge integration in virtual teams: the potential role of KMS, 1029–1037
knowledge management: hype, hope, or help?, 1019–1028
knowledge management in three organizations: an exploratory study, 1047–1059
mundane knowledge management and micro-level organizational learning: an ethological approach, 1038–1046
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
Hyperindex Browser
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Hyperlinks. *See also* URL (Uniform Resource Locator)
cognitive styles and hypermedia navigation: development of a learning model, 3–15
conceptualizing documentation on the Web: an evaluation of different heuristic-based models for counting links between university Web sites, 995–1005
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
Web page change and persistence—a four-year longitudinal study, 162–171

Icons
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
Incompleteness
sampling and concentration values of incom-plete bibliographies, 271–281
Index Terms. ***See also*** **Search Terms**
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
automatic extraction of document keyphrases for use in digital libraries: evaluation and applications, 653–677
a context vector model for information retrieval, 236–249
Indexing. ***See also*** **Automatic Indexing**
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
a survey in indexing and searching XML documents, 415–437
Indirect-Collective Referencing
indirect-collective referencing (ICR) in the elite journal literature of physics. II. a literature science study on the level of communications, 47–56
Inductive Design Process
information architecture without internal theory: an inductive design process, 839–845
Information Access
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Information Architecture
a design analysis model for developing World Wide Web sites, 531–535
designing a new urban Internet, 863–865
information architecture: looking ahead, 874–876
information architecture: notes toward a new curriculum, 824–830
information architecture for bilingual Web sites, 866–873
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838
information architecture in *JASIST:* just where did we come from?, 821–823
information architecture without internal theory: an inductive design process, 839–845
information interaction: providing a framework for information architecture, 855–862
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Information Management
knowledge management: hype, hope, or help?, 1019–1028
Information Retrieval. ***See also*** **Searching; Web Searching**
an expressive and efficient language for XML information retrieval, 438–453
on bidirectional English–Arabic search, 1139–1151
Information Retrieval *(Continued)*
combining and selecting characteristics of information use, 378–396
data discretization for novel relationship dis-covery in information retrieval, 736–746
epistemology and socio-cognitive perspective in information science, 257–270
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
on recommending [by document retrieval system], 747–763
research anxiety and students' perceptions of research: an experiment. part I. effect of teaching Kuhlthau's ISP model, 282–294
a survey in indexing and searching XML documents, 415–437
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Information Retrieval System Evaluation
using graded relevance assessments in IR evaluation, 1120–1129
Information Retrieval Systems
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
a context vector model for information retrieval, 236–249
form and function: the impact of query term and operator usage on Web search results, 95–108
multitasking information seeking and search-ing processes, 639–652
stochastic modeling of usage patterns in a Web-based information system, 536–548
strategic help in user interfaces for information retrieval, 343–358
Information Science
banking (on) different forms of symbolic capital, 1267–1270
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation,* 953–959
emerging information society and history of information science in Romania, 41–46
epistemology and socio-cognitive perspective in information science, 257–270
library and information science (LIS) in aid of meta-analysis [letter to the editor], 323
meta-analysis should also be visible inside information science [letter to the editor], 324
a view to the future of the library and information science profession: a Delphi study, 397–408
Information-Seeking Behavior
beyond logs and surveys: in-depth measures of people's Web use skills, 1239–1244
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258
design criteria for children's Web portals: the users speak out, 79–94
disciplinary differences and undergraduates' information-seeking behavior, 631–638
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
information and information sources in tasks of varying complexity, 581–591
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
information-seeking and mediated searching. part 2. uncertainty and its correlates, 704–715
information-seeking and mediated searching. part 3. successive searching, 716–727
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
introduction and overview: effective methods for studying information seeking and use, 1218–1222
a longitudinal study of World Wide Web users' information-searching behavior, 67–78
methodology for a project examining cognitive categories for library information in young children, 1223–1231
multitasking information seeking and search-ing processes, 639–652
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
work tasks and socio-cognitive relevance: a specific example, 960–965
Information Sources
information and information sources in tasks of varying complexity, 581–591
Information Technology
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
co-evolution of user and organizational inter-faces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611

Information Technology (*Continued*)
a view to the future of the library and information science profession: a Delphi study, 397–408
Information Use
beyond logs and surveys: in-depth measures of people's Web use skills, 1239–1244
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258
introduction and overview: effective methods for studying information seeking and use, 1218–1222
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Information Visualization
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
data discretization for novel relationship dis-covery in information retrieval, 736–746
domain visualization using VxInsight® for science and technology management, 764–774
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Informetrics
a new model that generates Lotka's law, 209–219
InQuery System
using graded relevance assessments in IR evaluation, 1120–1129
Integers
integer partitions result in skewed rank-frequency distributions [letter to the editor], 1276
Interaction
information interaction: providing a framework for information architecture, 855–862
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
Internationalism
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation*, 953–959
Internet. *See also* World Wide Web
designing a new urban Internet, 863–865
digital reference: reference librarians' experiences and attitudes, 549–566
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
ISI Journal Citations Reports on CD-ROM
algorithmic procedure for finding semantically related journals, 1113–1119
Journal of Documentation
Internet (*Continued*)
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation*, 953–959
Journal of the American Society for Information Science and Technology
a comparison of foreign authorship distribution in *JASIST* and the *Journal of Documentation*, 953–959
what's new in *JASIST*, 614
Journal Publishing
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
Journals
algorithmic procedure for finding semantically related journals, 1113–1119
dynamic and evolutionary updates of classificatory schemes in scientific journal structures, 987–994
Judgment
collaborative relevance judgment: a group consensus method for evaluating user search performance, 220–231
judgment of information quality and cognitive authority in the Web, 145–161
user perspectives on relevance criteria: a comparison among relevant, partially relevant, and not-relevant judgments, 327–342
Kea Automatic Keyphrase Extraction Algorithm
automatic extraction of document keyphrases for use in digital libraries: evaluation and applications, 653–677
Kebler, R.W.
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
Keywords. *See* Index Terms; Search Terms
KidsClick
design criteria for children's Web portals: the users speak out, 79–94
Knowledge Discovery
data discretization for novel relationship dis-covery in information retrieval, 736–746
Knowledge Management
introduction to the *JASIST* special section on knowledge management, 1008
knowledge integration in virtual teams: the potential role of KMS, 1029–1037
knowledge management: hype, hope, or help?, 1019–1028
knowledge management and the dynamic nature of knowledge, 1009–1018
knowledge management in three organizations: an exploratory study, 1047–1059
mundane knowledge management and micro-level organizational learning: an ethological approach, 1038–1046
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
social capital, value, and measure: Antonio Negri's challenge to capitalism, 1074–1082
Knowledge Navigator
engineering a search engine (WebLib) and browser (Knowledge Navigator) for digital libraries: global knowledge discovery tools exclusively for librarians and libraries on the Web [letter to the editor], 1273–1275
Korea
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
Kulthau's Information Search Process
research anxiety and students' perceptions of research: an experiment. part I. effect of teaching Kuhlthau's ISP model, 282–294
Law Enforcement Agencies
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Learning
cognitive styles and hypermedia navigation: development of a learning model, 3–15
mundane knowledge management and micro-level organizational learning: an ethological approach, 1038–1046
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
Libraries and Librarians. *See also* Digital Libraries
a database selection expert system based on reference librarian's database selection strategy: a usability and empirical evaluation, 567–580
digital reference: reference librarians' exper-iences and attitudes, 549–566
disciplinary differences and undergraduates' information-seeking behavior, 631–638
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
methodology for a project examining cognitive categories for library information in young children, 1223–1231
state digital library usability: contributing organizational factors, 1085–1097
Library and Information Science. *See also* Information Science
banking (on) different forms of symbolic capital, 1267–1270
information architecture: notes toward a new curriculum, 824–830
library and information science (LIS) in aid of meta-analysis [letter to the editor], 323
a view to the future of the library and information science profession: a Delphi study, 397–408
Literature Obsolescence
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
Logistic Regression Analysis
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377

Longitudinal Studies
a longitudinal study of World Wide Web users' information-searching behavior, 67–78
Web page change and persistence—a four-year longitudinal study, 162–171
Lotka's Law
duality revisited: construction of fractional frequency distributions based on two dual Lotka laws, 789–801
a new model that generates Lotka's law, 209–219
LycosZone
design criteria for children's Web portals: the users speak out, 79–94
Machine Translation System
on bidirectional English–Arabic search, 1139–1151
Mad Cow Disease
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Malaysia
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
Maps
domain visualization using VxInsight® for science and technology management, 764–774
Mass Extinction Concept
visualizing and tracking the growth of competing paradigms: two case studies, 678–689
Mediated Searching. *See* Searching
Medical Informatics
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
MELVYL Online Catalog
stochastic modeling of usage patterns in a Web-based information system, 536–548
Mental Models
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
Menus (Software). *See* User Interfaces
Meta-Analysis
library and information science (LIS) in aid of meta-analysis [letter to the editor], 323
meta-analysis should also be visible inside information science [letter to the editor], 324
Multimodal Relevance Optimization
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Multiple Query Evaluation Techniques
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Multitasking Behavior
multitasking information seeking and search-ing processes, 639–652
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Mundane Knowledge Management
mundane knowledge management and micro-level organizational learning: an ethological approach, 1038–1046
Mutual Information Formula
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
Natural Language Queries
getting answers to natural language questions on the Web, 359–364
Navigation. *See also* Hyperlinks
cognitive styles and hypermedia navigation: development of a learning model, 3–15
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
a novel navigation paradigm for XML repositories, 515–525
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Negri, Antonio
social capital, value, and measure: Antonio Negri's challenge to capitalism, 1074–1082
New Urbanism
designing a new urban Internet, 863–865
News Retrieval
a personal agent for Chinese financial news on the Web, 186–196
Niching Method
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Nigeria
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611
Normalization
an algorithm for term conflation based on tree structures, 199–208
Object-Oriented Model
a survey in indexing and searching XML documents, 415–437
Obsolescence
unfounded attribution of the "half-life" index-number of literature obsolescence to Burton and Kebler: a literature science study, 1098–1105
will this paper ever be cited?, 232–235
Online Databases
a database selection expert system based on reference librarian's database selection strategy: a usability and empirical evaluation, 567–580
Online Public Access Catalogs (OPACs)
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
stochastic modeling of usage patterns in a Web-based information system, 536–548
Operators
form and function: the impact of query term and operator usage on Web search results, 95–108
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
Organizations
co-evolution of user and organizational interfaces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
knowledge integration in virtual teams: the potential role of KMS, 1029–1037
knowledge management and the dynamic nature of knowledge, 1009–1018
knowledge management in three organizations: an exploratory study, 1047–1059
mundane knowledge management and micro-level organizational learning: an ethological approach, 1038–1046
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
state digital library usability: contributing organizational factors, 1085–1097
Pask's Holist/Serialist Differences
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
Permanence
Web page change and persistence—a four-year longitudinal study, 162–171
Personal Preferences
bounded rationality and satisficing in young people's Web-based decision making, 16–27
Personnel. *See* Human Resources
Physicians
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250
Physics Literature
indirect-collective referencing (ICR) in the elite journal literature of physics. II. a literature science study on the level of communications, 47–56
Portals. *See* Web Portals
Precision
30,000 hits may be better than 300: precision anomalies in Internet searches, 879–882
using graded relevance assessments in IR evaluation, 1120–1129
Printed Materials. *See also* Publishing
a case study of information-seeking behavior in 7-year-old children in a semistructured situation, 904–922
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611
Probabilistic Model
a survey in indexing and searching XML documents, 415–437
Problem Solving
cognitive and task influences on Web searching behavior, 109–119
facilitating community information seeking using the Internet: findings from three public library–community network systems, 894–903
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)

Problem Solving (*Continued*)
information-seeking and mediated searching. part 2. uncertainty and its correlates, 704–715
Productivity
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
a new model that generates Lotka's law, 209–219
Proximal Nodes Model
XQL and proximal nodes, 504–514
Public Agencies
co-evolution of user and organizational interfaces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
information and information sources in tasks of varying complexity, 581–591
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Public Libraries. ***See*** **Libraries and Librarians**
Publishing
an exploratory study of Malaysian publication productivity in computer science and information technology, 974–986
socio-economic factors in the application of information and communication technologies in Nigerian print media, 602–611
Quality Management
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
Quality of Information
believe it or not: factors influencing credibility on the Web, 134–144
judgment of information quality and cognitive authority in the Web, 145–161
Queries. ***See also*** **Query Language, XML**
on bidirectional English–Arabic search, 1139–1151
EquiX—a search and query language for XML, 454–466
getting answers to natural language questions on the Web, 359–364
querying and ranking XML documents, 489–503
Query By Example
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Query Formulation
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
a database selection expert system based on reference librarian's database selection strategy: a usability and empirical evaluation, 567–580
form and function: the impact of query term and operator usage on Web search results, 95–108
information-seeking and mediated searching. part 3. successive searching, 716–727
information-seeking and mediated searching. part 5. user–intermediary interaction, 883–893
Query Formulation (*Continued*)
strategic help in user interfaces for information retrieval, 343–358
30,000 hits may be better than 300: precision anomalies in Internet searches, 879–882
on using genetic algorithms for multimodal relevance optimization in information retrieval, 934–942
using graded relevance assessments in IR evaluation, 1120–1129
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Query Language, XML
an expressive and efficient language for XML information retrieval, 438–453
EquiX—a search and query language for XML, 454–466
a typed text retrieval query language for XML documents, 467–488
XQL and proximal nodes, 504–514
Ranking
querying and ranking XML documents, 489–503
on recommending [by document retrieval system], 747–763
a survey in indexing and searching XML documents, 415–437
Recall
using graded relevance assessments in IR evaluation, 1120–1129
Recommender Systems
on recommending [by document retrieval system], 747–763
Reference Point Visualization Systems
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
Reference Services
digital reference: reference librarians' experiences and attitudes, 549–566
References. ***See also*** **Citations**

stochastic modeling of usage patterns in a Web-based information system, 536–548
Statistical Data
co-evolution of user and organizational inter-faces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
Stemming Algorithms
an algorithm for term conflation based on tree structures, 199–208
Stochastic Modeling
stochastic modeling of usage patterns in a Web-based information system, 536–548
Strategic Help
strategic help in user interfaces for information retrieval, 343–358
Students. *See also* Children; Graduate Students; Undergraduate Students
bounded rationality and satisficing in young people's Web-based decision making, 16–27
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
cognitive styles and hypermedia navigation: development of a learning model, 3–15
design criteria for children's Web portals: the users speak out, 79–94
methodology for a project examining cognitive categories for library information in young children, 1223–1231
research anxiety and students' perceptions of research: an experiment. part I. effect of teaching Kuhlthau's ISP model, 282–294
research anxiety and students' perceptions of research: an experiment. part II. content analysis of their writings on two exper-iences, 295–307
Subject Terms. *See* Index Terms; Search Terms
Success-Breeds-Success Principle
a new model that generates Lotka's law, 209–219
Successive Searching
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
information-seeking and mediated searching. part 3. successive searching, 716–727
Surveys. *See also* User Studies
digital reference: reference librarians' exper-iences and attitudes, 549–566
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
multitasking information seeking and search-ing processes, 639–652
Symbolic Capital
banking (on) different forms of symbolic capital, 1267–1270
Task Complexity
information and information sources in tasks of varying complexity, 581–591
work tasks and socio-cognitive relevance: a specific example, 960–965
Technology. *See* Science and Technology
Tequyla-TX
a typed text retrieval query language for XML documents, 467–488
Term Co-occurrence
automatic thesaurus generation for Chinese documents, 1130–1138
a context vector model for information retrieval, 236–249
Term Weighting
combining and selecting characteristics of information use, 378–396
a context vector model for information retrieval, 236–249
Text
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
XML and free text, 526–528
Text Processing
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
Theory
information architecture without internal theory: an inductive design process, 839–845
Thesauri
automatic thesaurus generation for Chinese documents, 1130–1138
Thumbnails
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
Translation
on bidirectional English–Arabic search, 1139–1151
TREC Test Collection
on bidirectional English–Arabic search, 1139–1151
using graded relevance assessments in IR evaluation, 1120–1129
Tree Matching
querying and ranking XML documents, 489–503
Tree Structures
an algorithm for term conflation based on tree structures, 199–208
Typed Text Query Language
a typed text retrieval query language for XML documents, 467–488
Uncertainty
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
information-seeking and mediated searching. part 2. uncertainty and its correlates, 704–715
Undergraduate Students
disciplinary differences and undergraduates' information-seeking behavior, 631–638
United Kingdom
conceptualizing documentation on the Web: an evaluation of different heuristic-based models for counting links between university Web sites, 995–1005
Universities
conceptualizing documentation on the Web: an evaluation of different heuristic-based models for counting links between university Web sites, 995–1005
University of California MELVYL Systemwide Library Catalog
stochastic modeling of usage patterns in a Web-based information system, 536–548
URL (Uniform Resource Locator). *See also* Hyperlinks
methods for measuring search engine perfor-mance over time, 308–319
Web page change and persistence—a four-year longitudinal study, 162–171
User Interfaces
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
co-evolution of user and organizational inter-faces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
cognitive styles and hypermedia navigation: development of a learning model, 3–15
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
state digital library usability: contributing organizational factors, 1085–1097
strategic help in user interfaces for information retrieval, 343–358
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
User Preferences
bounded rationality and satisficing in young people's Web-based decision making, 16–27
a personal agent for Chinese financial news on the Web, 186–196
User Profiles
a personal agent for Chinese financial news on the Web, 186–196
User Searchers. *See* Searching
User Studies. *See also* Surveys
beyond logs and surveys: in-depth measures of people's Web use skills, 1239–1244
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
co-evolution of user and organizational inter-faces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
complementary user-centered methodologies for information seeking and use: system design in the Biological Information Browsing Environment (BIBE), 1251–1258
following experts at work in their own information spaces: using observations methods to develop tools for the digital library, 1245–1250

User Studies *(Continued)*
"I spent 1 ½ hours sifting through one large box. . . .": diaries as information behavior of the archives user: lessons learned, 1232–1238
the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
state digital library usability: contributing organizational factors, 1085–1097
when a better interface and easy navigation aren't enough: examining the information architecture in a law enforcement agency, 846–854
Vector Space Model
a context vector model for information retrieval, 236–249
Virtual Libraries. ***See*** **Digital Libraries**
Virtual Teams
knowledge integration in virtual teams: the potential role of KMS, 1029–1037
Visual Information Retrieval Interfaces
an investigation on the influence of indexing exhaustivity and term distributions on a document space, 943–952
testing visual information retrieval methodologies case study: comparative analysis of textual, icon, graphical, and "spring" displays, 28–40
Visualization of Information. ***See*** **Information Visualization**
VxInsight Software
domain visualization using VxInsight® for science and technology management, 764–774
Web of Science
analysis of SciFinder Scholar and Web of Science citation searches, 1210–1215
Web Pages and Web Sites. ***See also*** **Web Searching; World Wide Web**

a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
conceptualizing documentation on the Web: an evaluation of different heuristic-based models for counting links between university Web sites, 995–1005
a design analysis model for developing World Wide Web sites, 531–535
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
hyperlink–affiliation network structure of top Web sites: examining affiliates with hyperlink in Korea, 592–601
information architecture for bilingual Web sites, 866–873
state digital library usability: contributing organizational factors, 1085–1097
Web page change and persistence—a four-year longitudinal study, 162–171
Web Portals
design criteria for children's Web portals: the users speak out, 79–94
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838
Web Searching. ***See also*** **Searching**
believe it or not: factors influencing credibility on the Web, 134–144
beyond logs and surveys: in-depth measures of people's Web use skills, 1239–1244
bounded rationality and satisficing in young people's Web-based decision making, 16–27
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
cognitive and task influences on Web searching behavior, 109–119
a comparison of the use of text summaries, plain thumbnails, and enhanced thumbnails for Web search tasks, 172–185
design criteria for children's Web portals: the users speak out, 79–94
the effects of menu design on information-seeking performance and user's attitude on the World Wide Web, 923–933
form and function: the impact of query term and operator usage on Web search results, 95–108
the influence of mental models and goals on search patterns during Web interaction, 1152–1169
introduction to the special issue on Web research, 65–66
judgment of information quality and cognitive authority in the Web, 145–161
Web Searching *(Continued)*
a longitudinal study of World Wide Web users' information-searching behavior, 67–78
multitasking information seeking and search-ing processes, 639–652
relevance of Web documents: Ghosts Consensus Method, 783–788
subject categorization of query terms for exploring Web users' search interests, 617–630
30,000 hits may be better than 300: precision anomalies in Internet searches, 879–882
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
WebLib
engineering a search engine (WebLib) and browser (Knowledge Navigator) for digital libraries: global knowledge discovery tools exclusively for librarians and libraries on the Web [letter to the editor], 1273–1275
Weickian Sensemaking
organizational measures as a form of knowledge management: a multitheoretic, communication-based exploration, 1060–1073
Weighted Boolean Model
a survey in indexing and searching XML documents, 415–437
Weighted Information Retrieval
combining and selecting characteristics of information use, 378–396
Welsh
information architecture for bilingual Web sites, 866–873
WHIRL
an expressive and efficient language for XML information retrieval, 438–453
Wisconsin BadgerLink
state digital library usability: contributing organizational factors, 1085–1097
Witkin's Field Dependent/Independent Differences
cognitive styles and hypermedia navigation: development of a learning model, 3–15
information-seeking and mediated searching. part 1. theoretical framework and re-search design, 695–703, 1277 (erratum)
information-seeking and mediated searching. part 4. cognitive styles in information-seeking, 728–735
Women
scenarios in the Afya Project as a participatory action research (PAR) tool for studying information seeking and use across the "digital divide," 1259–1266
Word Segmentation
automatic thesaurus generation for Chinese documents, 1130–1138
using statistical and contextual information to identify two- and three-character words in Chinese text, 365–377
Work-Related Tasks
information and information sources in tasks of varying complexity, 581–591
work tasks and socio-cognitive relevance: a specific example, 960–965
World Wide Web. ***See also*** **Internet; Web Pages and Web Sites; Web Searching; XML (eXtensible Markup Language)**
banking (on) different forms of symbolic capital, 1267–1270
believe it or not: factors influencing credibility on the Web, 134–144
on bidirectional English–Arabic search, 1139–1151
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
co-evolution of user and organizational inter-faces: a longitudinal case study of WWW dissemination of national statistics, 1192–1209
design criteria for children's Web portals: the users speak out, 79–94

the impact of the Internet on public library use: an analysis of the current consumer market for library and Internet services, 802–820
information architecture: notes toward a new curriculum, 824–830
information architecture for bilingual Web sites, 866–873
information architecture for the Web: the IA Matrix approach to designing children's portals, 831–838

World Wide Web (*Continued*)
information architecture without internal theory: an inductive design process, 839–845
information interaction: providing a framework for information architecture, 855–862
judgment of information quality and cognitive authority in the Web, 145–161
methods for measuring search engine perfor-mance over time, 308–319
a personal agent for Chinese financial news on the Web, 186–196
stochastic modeling of usage patterns in a Web-based information system, 536–548
XML (eXtensible Markup Language)
an expressive and efficient language for XML information retrieval, 438–453
XML (eXtensible Markup Language) (*Continued*)
EquiX—a search and query language for XML, 454–466
a novel navigation paradigm for XML repositories, 515–525
preface: XML, 413–414
querying and ranking XML documents, 489–503
a survey in indexing and searching XML documents, 415–437
a typed text retrieval query language for XML documents, 467–488
XML and free text, 526–528
XQL and proximal nodes, 504–514
XML File System (XMLFS)
a novel navigation paradigm for XML repositories, 515–525
XML-QL
an expressive and efficient language for XML information retrieval, 438–453
XQL Query Language
XQL and proximal nodes, 504–514
Yahoo
Web searching: a process-oriented experimental study of three interactive search paradigms, 120–133
Yahooligans!
children's use of the Yahooligans! Web search engine. III. cognitive and physical behaviors on fully self-generated search tasks, 1170–1183
design criteria for children's Web portals: the users speak out, 79–94
